## **DETAILED ACTION**

1. This action is in response to the amendment filed on July 26th, 2007. Claims 2, 3, 5, 9 and 13 are cancelled. Claims 1, 4, 6-8, 10-12 and 14-20 are pending and have been considered below.

## Claim Rejections - 35 USC § 103

- 2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 3. Claims 1, 4, 6-8, 10-12 and 14-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over by Lee (US 6,628,413 B1) in view of Ogino et al. ("Ogino", US 2002/0054109 A1).
  - Claim 1: <u>Lee</u> discloses a method and system for providing printer information to a user (i.e. ... provide a bi-directional communications between an application or printer driver and a java printer... col 2 lines 43-46 and Figs. 1 and 2), the method comprising:

ł

Application/Control Number: 10/700,132 Page 3

Art Unit: 2174

displaying a dialog box to a user in response to a user input (the page shown in Fig. 3 is displayed in response to a request for a document) ( col 4 lines 56-60);

and in response to the user actuating the link (selecting hypertext link 134)
 (col 5 lines 12-15), providing the user with the information corresponding to
 the printer (i.e. ... on-line information can be provided by selecting a hypertext
 link 134... col 5 lines 12-17, and "Or, if need help, press Help" in Fig. 3).

but does not disclose

- the print dialog box including a properties dialog box.
- in response to the user actuating the properties actuator, displaying multiple
  properties pages including a Support Manual page, the Support Manual page
  being distinct from other Properties pages and including a link to a Web site,
  the Web site including the information corresponding to a printer being used
  by the user

However, <u>Ogino</u> disclose the print dialog box comprises a Properties actuator (Fig. 5), which, in response to actuation thereof, displays multiple pages including a link that can provide Support Manual (i.e. HELP link in Fig. 6a). Therefore, it would have been obvious to an artisan at the time of the invention to combine <u>Ogino</u>'s teaching with <u>Lee</u>, to provide these features, in <u>Lee</u> in order to make the user interface more interactive and helpful so that the user can get to help or support manuals readily.

Art Unit: 2174

on/Control Number. 10// 00, 13

Claim 4: <u>Lee</u> and <u>Ogino</u> disclose a method and system for providing printer information to a user, as in above claim 1. Furthermore, <u>Ogino</u> discloses, wherein the link is further provided on a first of the multiple Properties pages displayed to the user in response to the user actuating the Properties actuator (Figs. 4).

Therefore, it would have been obvious to an artisan at the time of the invention to provide this feature, in <u>Lee</u> in order to make the user interface efficient and helpful, especially since this type of interface is very common in print dialog screens.

Claim 6: <u>Lee</u> and <u>Ogino</u> disclose a method and system for providing printer information to a user, as in above claim 1. Furthermore, <u>Ogino</u> disclose, wherein the other Properties pages include a Layout page, a Print/Quality page, and an About page (i.e...., Paper, Finish/Image Quality and Main tabs, Fig. 4). Therefore, it would have been obvious to obvious to an artisan at the time of the invention to provide these features, in <u>Lee</u> in order to provide multiple page/tab interfaces, so that the user can see all the options available at once.

Claim 7: <u>Lee</u> and <u>Ogino</u> disclose a method and system for providing printer information to a user, as in above claim 2. Furthermore, <u>Lee</u> discloses wherein the information corresponding to the printer includes user manual of the printer (i.e. ... on-line information can be provided by selecting a hypertext link Help ... col 5 lines 12-17 and Fig. 3).

Art Unit: 2174

Claim 8: <u>Lee</u> and <u>Ogino</u> disclose a method and system for providing printer information to a user, as in above claim 1. Furthermore, <u>Ogino</u> discloses

- providing a list of printers from which the user is able to print, each of the printers having corresponding printer information associated therewith (i.e. select PRINT in Fig. 5);
- in response to the user selecting one of the printers of the list, displaying a
  corresponding print dialog box including a respective Properties actuator (i.e.
  PROPERTY in property window, Fig. 5);
- and in response to the user actuating the respective Properties actuator,
  displaying corresponding multiple Properties pages (i.e. Page Tabs, Fig. 6a)
  including a respective Support Manual page including a corresponding link to
  a Web site including the corresponding printer information associated with the
  selected printer (i.e. Help link, Fig. 6a).

Therefore, it would have been obvious to one having ordinary skill in the art at the time to provide these features, in <u>Lee</u> in order to provide a select list of printers, as it is very easy to select a printer from a drop down menu than to type in the network path, which can be time consuming and error prone step.

Claim 10: <u>Lee</u> and <u>Ogino</u> disclose a method and system for providing printer information to a user, as in above claim 1. Furthermore, <u>Lee</u> discloses wherein,

Art Unit: 2174

the information corresponding to the link to the Web site is stored in the printer (i.e. ... local help ... col 5 lines 15-17).

Claim 11: <u>Lee</u> and <u>Ogino</u> disclose a method and system for providing printer information to a user, as in above claim 9. Furthermore, <u>Lee</u> discloses wherein, information corresponding to the link to the Web site stored a server communicated with the printer (i.e. ... remotely stored help... col 5 lines 15-17).

Claim 12: <u>Lee</u> and <u>Ogino</u> disclose a method and system for providing printer information to a user, as in above claim 1. Furthermore, <u>Lee</u> discloses wherein the Web site comprises multiple Web pages, and the link to the Web site corresponds to one of the Web pages including the information corresponding to the printer ("hypertext link <u>Help?</u> 134" in Figs. 3-4).

Claim 14: As the scope of this claim is similar to the scope in claim 1, this claim is rejected under the same rationale.

Claim 15: <u>Lee</u> and <u>Ogino</u> disclose a method and system for providing printer information to a user, as in above claim 14. Furthermore, <u>Lee</u> discloses a computer system comprising: a processor operative to execute instructions; memory communicating with the processor and operative to store instructions

Art Unit: 2174

executable by the processor; and printer interface instructions stored by the memory (i.e. ... print server 102 includes CPU, RAM, storage, input device, ... col 3 lines 29-51 and Figs. 1-2), the printer interface instructions being operative to display the print dialog box to the user in response to a user input (the page shown is Fig. 3 is displayed in response to a request for a document) (col 4 lines 56-60), the link being displayed in association with the print dialog box (the page includes hypertext link 134, col 5 lines 12-15).

Claim 16: As the scope of this claim is similar to the scope in claim 8, this claim is rejected under the same rationale.

Claim 17 Lee and Ogino disclose a method and system for providing printer information to a user, as in above claim 15. Furthermore, Lee discloses a printer communicating with the computer system (Fig. 1).

Claim 18: Lee and Ogino disclose a method and system for providing printer information to a user, as in above claim 15. Furthermore, , Lee discloses wherein the information corresponding to the link to the Web site is stored by the printer (i.e. Java printer software stored in device 110, Fig. 2).

Art Unit: 2174

Claim 19: <u>Lee</u> and <u>Ogino</u> disclose a method and system for providing printer information to a user, as in above claim 15. Furthermore, <u>Lee</u> discloses wherein the information corresponding to the link to the Web site is stored by the computer system (i.e. Java printer software stored in Windows NT server 102, Fig. 1).

Claim 20: <u>Lee</u> and <u>Ogino</u> disclose a method and system for providing printer information to a user, as in above claim 14. Furthermore, <u>Lee</u> discloses means for displaying the link (Figs. 3-6).

## Response to Arguments

- 4. Applicant's arguments filed on July 26<sup>th</sup>, 2007 have been fully considered but they were found not persuasive.
- 5. Applicant argues, "With respect to the Lee and Ogino references, Applicant submits that these references, individually or in combination, do not disclose a method for providing printer information to a user as claimed in independent claim 1, and do not disclose a system for providing printer information to a user as claimed in independent claim 14 including display of multiple Properties pages including a Support Manual page, with the Support Manual page being distinct from other Properties pages and including a link to a Web site, with the Web site including information corresponding to

a printer being used by the user". The examiner respectfully disagrees. Under the new 35 U.S.C. 103(a) obviousness-based rejection, Lee in combination with Ogino clearly teaches a method for providing printer information to users (Lee Fig. 1 and 2), including multiple properties page including Support Manual page, and a link to web site (Ogino Fig. 4). See individual claim rejection for details.

## Conclusion

1. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
